

Beams - Special solutions and standard selection of beams.

BEAMS

Beams can be delivered in standard design or produced after special needs from the sports hall or gym. The beams from Unisport Scandinavia can be delivered in different wood and different length and both as a single or double beam. Like all other facilities they can be specially design so they match the needs and interior of the sports hall or gym. The beams can be delivered with extra attachment, if preferred, and they can off course be produced so it fits

a pipe beam, a loose wood beam, a climbing net or something else. With the many different solutions, it is possible to challenge all target groups regardless of age or skill level. Thus the same beam set can be used to countless different activities. Our consultants are ready with suggestions and different possibilities. See examples of our many project solutions and get inspired to the arrangement of your sports hall or gym.
